DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Daniel Kim on June 27, 2005.

2. The application has been amended as follows:

In claim 31, line 7, after the word "Message" inserted --using the indicator in the received In-traffic System Parameter Message and an indicator of a dormant packet data session concurrent with the active call--.

Claim 32 is cancelled.

In claim 33, line 1, the number "32" is deleted and inserted with --31--.

The above amendment was made to place the claims allowable.

Allowable Subject Matter

3. Claims 1, 4-10, 12-22, 23-31, and 33-35 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or make obvious the step of or means for **"comparing a packet zone identifier of a packet data call transmitted from the second base station with a packet zone identifier of a dormant packet data call that is concurrent with the active voice call and maintained by the mobile station, said packet zone**

Art Unit: 2663

identifiers uniquely identifying a packet control function coverage area", when the comparing is considered within the specific structure of the method recited in claim 1.

The prior art of record fails to teach or make obvious the step of or means for

"receiving an In-traffic Parameter System from the second base station, said in-traffic System Parameter Message including a packet zone identifier designating a zone coverage for a packet control function processing packet data of the second base station", when the receiving is considered within the specific structure of the method recited in claims 7 and 22 or the device recited in claim 24. The prior art of record fails to teach or make obvious the step of or means for **"completing a dormant handoff using a Packet Control Function of the concurrent dormant packet data call when the packet zone identifiers are different from each other"**, when the completing is considered within the specific structure of the method recited in claim 18.

The prior art of record fails to teach or make obvious the step of or means for

"detecting a change in the packet zone based on the received In-traffic System Parameter Message using the indicator in the received In-traffic System Parameter Message and an indicator of a dormant packet data session concurrent with the active data call", when the detecting is considered within the specific structure of the method recited in claim 31.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
